253	HT		K7LRB, N8ELA & K7SXN	Baofeng UV-B5 VHF/UHF compact handheld with accessories	Storage Room in Box Labeled for John Lynn	This is a twin band VHF and UHF handeld radio, the predecessor to the UV-5R. The radio was tested and works. Included are an antenna, speaker mic, USB programming cable, 12 volt car adapter, battery charger and two marginal Li-ion batteries. Suggested minimum bid is \$15			08/27/22
271	Meter		KL7CY	Triplett Model 666-H VOM	Storage Room in Box Labeled for John Lynn	This is a very old Volt Ohm Milliamp meter and is working although the calibration is not very good. It requires a 1.5V C cell for the ohms range. There is currently no battery in it and the battery contacts are not corroded. The test leads are dried out and the insulation is cracking off of them, so the wire needs to be replaced. Also included is a very nice real leather carrying case. No minimum bid is suggested.			08/09/22
270	Meter		K7LRB	Lodestar DM-4061 Transistor Dip Meter	Storage Room in Box Labeled for John Lynn	This Transistor Dip Meter has been tested and is working. Included are 4 plug in coils that cover from 1.5 to 45 MHz and a print out of a partial manual from the Internet. This is like a (vacuum tube) grid dip meter which is commonly used to find the resonant frequency of a tuned circuit. Suggested minimum bid of \$10.			08/27/22
