

## **Repeater Committee Meeting Minutes for June 2, 2025**

Meeting started on Zoom at 07:00pm MST

All members (8) and one guest (Casey KF7RCS)

Opening remarks by new chairman Ed N9MW which included a belief that the Repeater Committee will be permanent, the Committee is staffed by the Club Board but ultimately it serves the Club members, we will loosely follow accepted meeting protocol and a plea that we listen to, consider and respect all opinions.

Chairman Ed reviewed the responsibilities and operation of the Committee. A volunteer for secretary to keep simple minutes is needed. We will be asked at least yearly for an equipment inventory (procedures are in place). Administrators with equipment control abilities are needed to assure the machines are operating properly or stop any unacceptable behavior on the machines. Members were strongly urged to keep other Committee members informed via a limited reflector of any events concerning Committee administration.

A review of our equipment was conducted. The .29 machine is running at the QTH of Dave, K2SS. Issues with the cavity set are pending. The .27 machine was discovered to be lacking correct output power and the wiring of the cavity set appears wrong. The UHF repeater is working from the fire station. The webSDR is working on 20 meters and can be accessed via a web browser at N7GV-SDR.club.

Chairman Ed stated we need to clearly identify our goals. As of right now our priority is to get the .27 machine fully operation and in place at the fire station. We will continue testing of the .29 machine (inclusive).
